-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Lo et al. US 6,791,155.

Lo et al. discloses a process of forming a shallow trench isolation including providing a substrate (100), forming a trench (105) in the substrate, depositing at least two insulating layers into the trench to form a STI structure, wherein an innermost of the insulating layers (130) substantially conforms to the base and the side walls of the trench and an outermost of the insulating layer (140) spans the side walls of the trench so a gap is formed in the trench, and planarizing the insulating layer (see figs. 1-4 and related text). Also disclosed is that the gap may be a vacuum or contain air, the insulating material may be silicon dioxide and the gap is sealed. Also Lo et al. discloses that various materials and dimensions may be used in forming the STI, and that various known semiconductor processing steps may be preformed before or after the formation of the STI. Lo et al. teaches that the STI structure is formed on a semiconductor substrate and it is well known that a silicon on insulator is a semiconductor substrate.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
